

2023 3Q & 4Q CAP Meeting – Tuesday, December 5

9:00AM, LAO Conference Center, New Hope Room

Attendees:

Theo Webre
Glynn Mayers
Mary Meyer
Eleanor Joffrion
Luci Garza
Clint Moore

Pam Boesch
Jason Manola
Roland “Blue” Leblanc
Riley “Pee Wee” Berthelot
Anna Johnson

Welcome

Community Impact – Mary Meyer, Glynn Mayers

- Review of the recent Glycol 2 incident and Root Cause Investigation hypothesis with CAP members.
 - Feedback from CAP members was positive and noted the quick response time of the Dow team to communicate to the community. Additional positive feedback on the transparency from the site throughout the emergency to present day.

EH&S Update – Mary Meyer

- Groundwater Update
Dow continues to conduct groundwater sampling in accordance with its Cooperative Agreement with Louisiana Department of Environmental Quality (LDEQ) and the U.S. Environmental Protection Agency (U.S. EPA) and the approved Implementation Plan.

At the time of the last CAP meeting in May, the 2Q 2023 event was just completed. Since the last CAP meeting, Dow conducted the Third Quarter 2023 sampling event in mid-July and the Fourth Quarter 2023 sampling event in November 2023. Dow notified the agencies of the sampling events and LDEQ was present for both sampling events and collected split samples.

Final data was validated for the Second and Third Quarter 2023 sampling events. The Second and Third Quarter 2023 sampling final validated Dow results for the Sentinel Well System met drinking water standards. No vinyl chloride (VC) were detected in these wells for either event.

IPark Updates – Eleanor Joffrion

- Successful turnarounds on the site with Glycol 1, and tenant Olin.
- Positive conversations with IPark tenants around incident response and communications.
